Atopic Dermatitis: The Itch That Rashes, 157

Correction: Pediatric Drug Information Article on Pegaspargase

Three publication errors appeared in the article "Pegaspargase" by David R. Alfieri in the September/October issue of *Pediatric Nursing* (see Pediatric Drug Information column, pages 471-474).

The Figures 2 and 3 legends were inadvertently reversed at the top of each figure. The diagram on the left side of page 472 should have been labeled as followed: Figure 2. Metabolism of Asparagine and Aspartate. The diagram on the right side of page 472 should have been labeled: Figure 3. Synthesis of Asparagine.

A line of type was also left off of Table 1 (see page 473) due to a printing error. The missing information at the bottom of the table (directly under E. Coli) should have read (left to right):

Erwinia 25,000 0.65 days ***

Pediatric Nursing regrets the errors published in this article.
